PROFESSIONAL SUMMARY

Software developer experienced in building web applications with PHP and Laravel. Proficient in backend logic, database management, and leveraging AI tools to write clean and efficient code. Seeking a Full Stack or Software Developer role to build reliable applications and deliver value to software teams.

WORK EXPERIENCE

MIS Intern – Krazy Media Digital Solutions Corp.
Sta. Cruz, Manila | May 2026 – July 2026

- Conducted quality assurance testing for the company's HRIS, evaluating system functionality and identifying bugs, inconsistencies, and usability issues, resulting in more reliable system performance and improved user experience.
- Trained team members on Gemini CLI, demonstrating its commands, features, and application in AI-assisted software development, resulting in improved understanding and adoption of AI tools in development workflows.
- Developed Flutter application components, writing and testing code based on project requirements and development standards, resulting in functional mobile application features that contributed to project development.

Student Assistant – Management Information Systems (MIS) – University of Caloocan City South
Caloocan City, Metro Manila | January 2024 – September 2025

- Resolved AIMS Portal account and navigation issues for students, providing front-line technical support and troubleshooting assistance, resulting in smoother access to academic records and online services.
- Troubleshot technical concerns reported by faculty members, providing timely support for classroom and office technology, resulting in minimal disruption to academic and administrative operations.
- Diagnosed and resolved hardware and network issues, including printer malfunctions and campus Wi-Fi connectivity problems, in coordination with the MIS Head, resulting in more reliable IT infrastructure and reduced operational downtime.

DSWD Cash for Work – Management Information Systems (MIS) – University of Caloocan City South
Caloocan City, Metro Manila | September 2024 – November 2024

- Encoded student and faculty information into the AIMS Portal, maintaining accurate and up-to-date records for administrative processes, resulting in more reliable data for academic and administrative operations.
- Supported the admissions team in processing student applications, providing technical assistance and resolving system-related concerns, resulting in more efficient application processing and fewer technical delays.
- Troubleshot software and hardware issues reported by faculty and administrative offices, providing timely technical support to resolve operational concerns, resulting in smoother day-to-day office operations.

PROJECTS

LibSys (Software Engineering Project) | *PHP Native, MySQL*

- Developed a full-stack library management system from the ground up using a custom PHP MVC architecture, featuring role-based access control (RBAC) for administrators, staff, and students.
- Implemented a comprehensive book catalog and borrowing/returning workflow, along with QR code integration for streamlined library check-ins and improved user efficiency.
- Designed the MySQL database and applied the Repository pattern for maintainable data management, while developing a dynamic frontend using Vanilla JavaScript.

iAIMS (Thesis Project) | *Laravel, Next.js, PostgreSQL (Ongoing)*

- Engineered backend core logic for administrative and registrar modules using Laravel, automating key record-processing functions and increasing administrative workflow efficiency.
- Designed PostgreSQL relational database schemas and optimized queries, enforcing data integrity across modules and reducing query response times during peak usage periods.
- Developed dynamic frontend user interfaces with Next.js and integrated RESTful APIs, delivering responsive user components and seamless web navigation for academic operations.

BorrowHub | *Laravel, React Native, MySQL*

- Architected and developed a full-stack equipment and resource borrowing platform featuring a Laravel RESTful API backend and a cross-platform React Native mobile application.
- Designed MySQL database schemas, implemented role-based authorization, and integrated automated reservation workflows to streamline resource tracking and approval processes.

BagyoAlerto (CodeSprout 2025 Hackathon Project) | *HTML5, CSS3, JavaScript, Weather API, PWA*

- Developed a Progressive Web App (PWA) for localized typhoon alerts and disaster preparedness, integrating the Geolocation API and external Weather APIs to provide location-based weather information.
- Implemented an interactive dashboard with real-time weather updates, emergency preparedness checklists, and essential emergency contact information to help users prepare for severe weather conditions.
- Implemented PWA capabilities for offline accessibility and an installable app experience, improving access to critical information during limited or unavailable internet connectivity.

SpecMatch (AppCon 2026: AI Matsuri Hackathon Project) | *Laravel, Inertia.js, MySQL*

- Designed and updated the front-end user interface, improving screen layouts and navigation to create a clearer, more user-friendly experience.
- Built the main features and core application logic using Laravel, connecting key backend tasks to complete the project on time for the competition.
- Cleaned up MySQL queries and passed data efficiently through Inertia.js, making pages load faster and reducing server response times.

Bantai (AppBuildersPH Hackathon Project) | *Kotlin, Local AI, Android*

- Engineered an Android application using Kotlin and Local AI during a two-day hackathon, enabling real-time detection of scam messages and instant alert notifications for users.
- Refactored core application logic and backend infrastructure, resolving critical bugs to ensure stable performance during live project demonstrations.

TECHNICAL SKILLS

Backend: PHP, Java, C

Frontend: JavaScript (ES6+), HTML5, CSS3

Databases: MySQL, SQLite

Frameworks: Laravel, Tailwind CSS, Bootstrap CSS

Tools & Platforms: Git/GitHub, Postman, XAMPP, CI/CD Workflow, RESTful Services

EDUCATION

Bachelor of Science in Computer Science
University of Caloocan City South, Metro Manila | *August 2023 – Present*

ICT (Information and Communication Technology)
Systems Plus Computer College, Caloocan City South, Metro Manila | *September 2021 – July 2023*
